# Safety information

## Important information

Read these instructions carefully and look at the equipment to become familiar with the device before trying to install, operate, service, or maintain it. The following special messages may appear throughout this manual or on the equipment to warn of potential hazards or to call attention to information that clarifies or simplifies a procedure.

The addition of either symbol to a “Danger” or “Warning” safety label indicates that an electrical hazard exists which will result in personal injury if the instructions are not followed.

This is the safety alert symbol. It is used to alert you to potential personal injury hazards. Obey all safety messages that accompany this symbol to avoid possible injury or death.

### **DANGER**

**DANGER** indicates a hazardous situation which, if not avoided, **will result in** death or serious injury.

**Failure to follow these instructions will result in death or serious injury.**

### **WARNING**

**WARNING** indicates a hazardous situation which, if not avoided, **could result in** death or serious injury.

### **CAUTION**

**CAUTION** indicates a hazardous situation which, if not avoided, **could result in** minor or moderate injury.

### **NOTICE**

NOTICE is used to address practices not related to physical injury.

# Wiser IP Camera Outdoor

CLP724419

## For your safety

<b>NOTICE</b>
<b>RISK OF DAMAGE TO DEVICE</b> Always operate the product in compliance with the specified technical data. <b>Failure to follow these instructions can result in equipment damage.</b>

## About the device

The Wiser IP camera outdoor (hereinafter referred to as **IP Camera**) is a Wi-Fi® operated device that is used to monitor sensitive outdoor areas of your home with a HD recording. You can install the camera indoors or outdoors in all directions (e.g. on the wall, under the roof, etc.). The IP camera can be triggered by other Wiser devices (such as sensors).

### Advantages of using an IP camera:

- Increases your overall security
- High resolution recording
- Covers a wide area
- Infrared night vision for low light recording

**NOTE:** Users are solely responsible for adhering to applicable laws (e.g. privacy or any other relevant laws around surveillance). Users must ensure that guarantees are taken to avoid any misuse of equipment for surveillance or entirely different and unexpected purposes than intended.

## Installing the device

Refer to the installation instruction supplied with this product.  
See Wiser IP Camera Outdoor.

## Downloading the app

Install the app on a mobile phone to commission and work with the Wiser system and devices.

1. Perform one of the following:
  - **For Apple mobile phones:** Visit <https://itunes.apple.com/us/app/wiser-by-se/id1026806919?ls=1&mt=8>.

#### Scan QR code to download app for Apple devices

- **For Android mobile phones:** Visit <https://play.google.com/store/apps/details?id=com.schneiderelectric.WiserBySE>.

#### Scan QR code to download app for Android devices

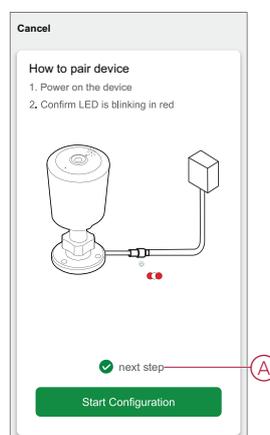

## Pairing the device

Using the Wiser app, pair your device with the local Wi-Fi network to register on cloud to access and control the device.

Before you pair the device, download the Wiser app, page 5 to your mobile device. Follow the steps to pair the device:

1. On the **Home** page, tap **+** icon and tap .
2. Plug-in the power cable to a power supply to power On the device.  
Make sure that the LED blinks red.
3. In the Wiser app, select **next step** (A) and tap **Start Configuration**.

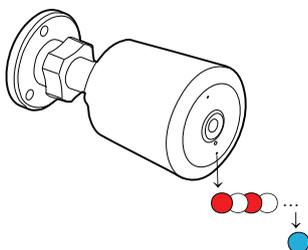

4. Select the **Wi-Fi network**, enter the **Password (B)** and tap **Next**.

**NOTE:** Make sure to first connect your mobile phone to the home Wi-Fi and select 2.4 GHz network.

5. Wait for a few seconds until the LED blinks blue and becomes stable.  
The blue LED on the IP camera shows that it is successfully connected to the Wi-Fi network and ready to use.

6. After the device is connected, tap **Done**.

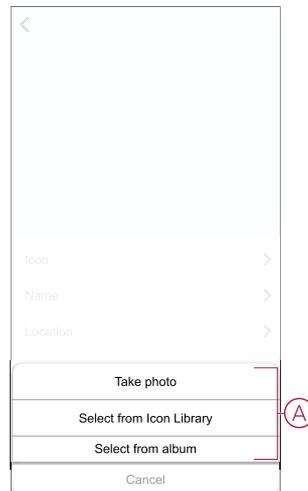

## Configuring the device

### Changing the device icon

You can change the device icon using the Wiser app.

1. On the **Home** page, select the device for which you wish to change the icon.
2. At the top-right corner of the screen, tap .
3. Tap edit  next to the device name.
4. Tap **Icon** to view the menu.

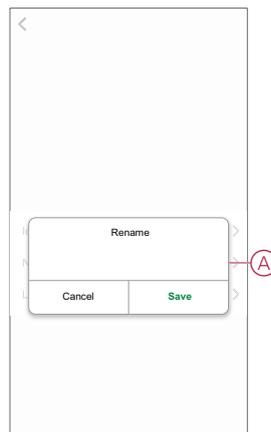

5. In the slide-up menu, select any one of the following (A) to change the device icon:
  - **Take photo** - allows you to click a photo from the mobile camera.
  - **Select from Icon Library** - allows you to select an icon from the app library.
  - **Select from Album** - allows you to select a photo from the mobile gallery.

## Renaming the device

You can rename the device using the Wisser app.

1. On the **Home** page, select the device for which you wish to rename.
2. At the top-right corner of the screen, tap .
3. Tap edit  next to the device name.
4. Tap **Name**, enter the new name (A) and then tap **Save**.

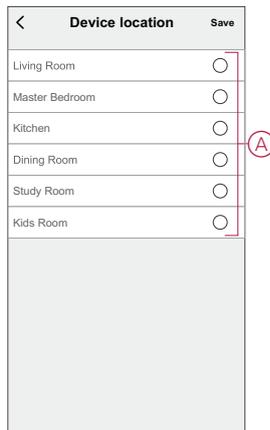

## Changing the device location

You can change the device location using the Wisser app.

1. On the **Home** page, select the device for which you wish to change the location.
2. At the top-right corner of the screen, tap .

3. Tap edit  next to the device name.
4. Tap **Location**.
5. Select the desired location from the list (A) and then tap **Save**.

## Configuring basic function settings

The basic function settings allows you to enable the **Status indicator** on the device and the **Time watermark** on the Wiser app.

### Status indicator

Enabling the **Status indicator** turns On/Off the LED on the device.

Follow the steps to enable the Status indicator:

1. On the **Home** page, tap **All devices** > **IP Camera Outdoor**.
2. Tap  and tap **Settings** > **Basic function settings**.
3. Tap the toggle switch (A) to enable the **Status indicator**.

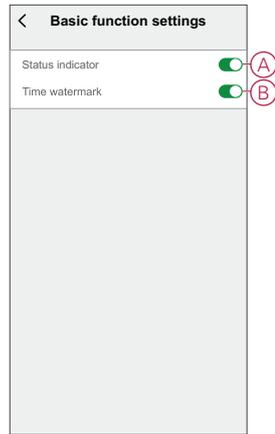

**NOTE:** The LED indicates blue on the device when the status indicator is turned On.

### Time watermark

Enabling the **Time watermark** displays the date and time on the live view on control panel.

Follow the steps to enable the Time watermark:

1. On the **Home** page, tap **All devices** > **IP Camera Outdoor**.
2. Tap  and tap **Settings** > **Basic function settings**.
3. Tap the toggle switch (B) to enable the **Time watermark**.

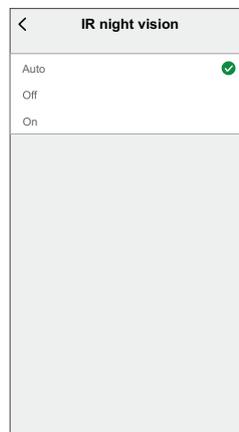

## Configuring IR night vision

The infrared LEDs in the camera allows you to see and record a clear black and white video/image in the dark.

Follow the steps to configure the IR night vision:

1. On the **Home** page, tap **All devices** > **IP Camera Outdoor**.
2. Tap  and tap **Settings** > **IR night vision**.
3. Select any one of the following options:
  - **Auto** - Turns on/off automatically when the environmental light is below/above a certain threshold of the lux level
  - **Off** - Turns off the IR night vision at all times
  - **On** - Turns on the IR night vision at all times

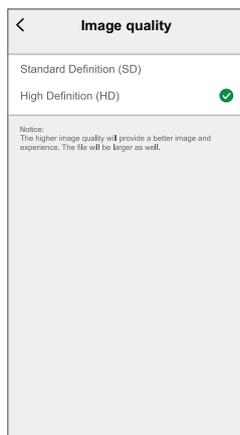

## Setting image quality

Using the wiser app, you can change the image quality based on your requirement.

**TIP:** You can switch to Standard Definition image quality when the Wi-Fi is slow or the memory card storage space is less.

1. On the **Home** page, tap **All devices** > **IP Camera Outdoor**.
2. Tap  and tap **Settings** > **Image Quality**.

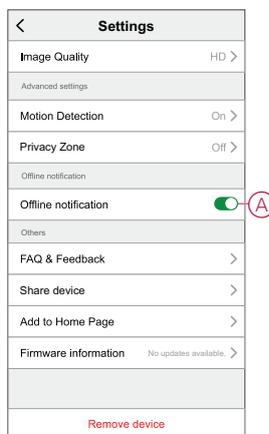

3. Select any one of the options:
  - **Standard Definition (SD)** - Captures low resolution video/image
  - **High Definition (HD)** - Captures high resolution video/image

## Setting offline notification

Using the wiser app, you can receive a notification when the IP camera is offline. Follow the steps to turn on the Offline notification:

1. On the **Home** page, tap **All devices** > **IP Camera Outdoor**.
2. Tap  and tap **Settings**.
3. Tap the toggle switch (A) to turn on the **Offline notification** and tap **Confirm**.

## Inserting a micro-SD card

The micro-SD card is inserted in the device to store the recording.

**NOTE:** The micro-SD card has to be inserted before you power On the device. If the device is already in On state, then switch Off the device to insert the micro-SD card.

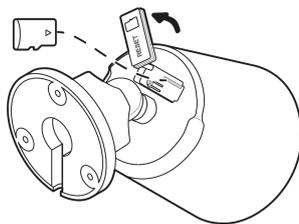

Follow the steps to insert a micro-SD card:

1. Remove the cover on the back of the camera.
2. Insert a micro-SD card in the memory card slot.

3. Close the cover.

Once the micro-SD card is inserted, you can configure the playback settings.

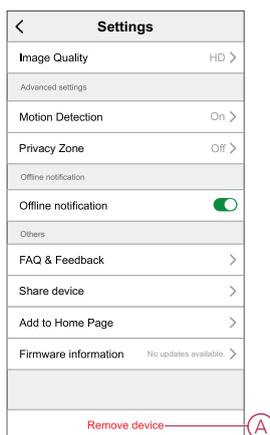

**NOTE:** A maximum of 128 GB SDHC and SDXC micro-SD cards with FAT32 format are supported.

## Removing the device

Using the Wiser app, you can remove a device from the device list. Follow the steps to remove the device:

1. On the **Home** page, tap **All devices > IP Camera Outdoor**.
2. Tap  icon and tap **Settings**.
3. Tap **Remove device (A)** and tap **Confirm**.

**TIP:** Alternatively, you can long tap on the **IP Camera Outdoor** on the home page to remove the device.

**NOTE:**

- Removing the device will reset the device. The LED starts blinking red indicating that the device is ready to pair with another network.
- If there is a problem while pairing, refer to troubleshooting, page 23 the device.

## Using the device

Using the control panel of the **IP Camera**, you can see live video of the outdoors on the display screen and includes the following features:

	Enables audio of the live video
	Makes the video fullscreen

	Takes screenshot of the live view
	Lets you communicate with a person near the device
	Records the live view
	Enables motion detection
	Enables private mode
	View the stored images or videos

**NOTE:**

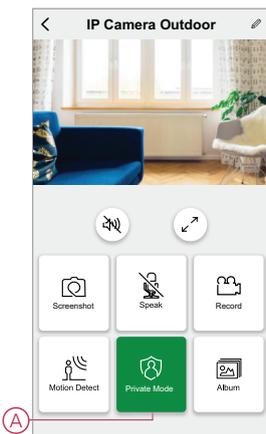

- To view the notification/alarm messages, tap  > **Message**.
- To review the recordings using playback feature, refer to [Playback](#).

## Using private mode

The Private Mode allows you to turn off the live view, thereby disabling all the other features on the control panel for all users connected to the same Zigbee network. Using this mode, the user is able to stay confidential during private moments.

Follow the steps to turn on the private mode:

1. On the **Home** page, tap **All devices** > **IP Camera Outdoor**.
2. Tap  > **Settings**.
3. Tap the toggle switch to turn on the **Private Mode**.
4. Alternatively, tap **Private Mode (A)** on the control panel.

## Detection alarm setting

The motion detection function enables the IP camera to detect motion in the surveillance area and display notifications in the Wiser app.

Follow the steps to enable the motion detection:

1. On the **Home** page, tap **All devices** > **IP Camera Outdoor**.

2. Tap  and tap **Settings > Motion Detection**.
3. Tap the toggle switch (A) to turn On the **Motion Detection Alerts**.

**TIP:** Alternatively, you can tap the  icon on the control panel.

## Alarm sensitivity level

Using the Wiser app, you can adjust the sensitivity level of your motion detector.

Tap **Alarm sensitivity level** (B) and select any one of the following levels:

- **Low**
- **Medium**
- **High**

**NOTE:** The high sensitivity level detects the slightest movement and triggers an alarm.

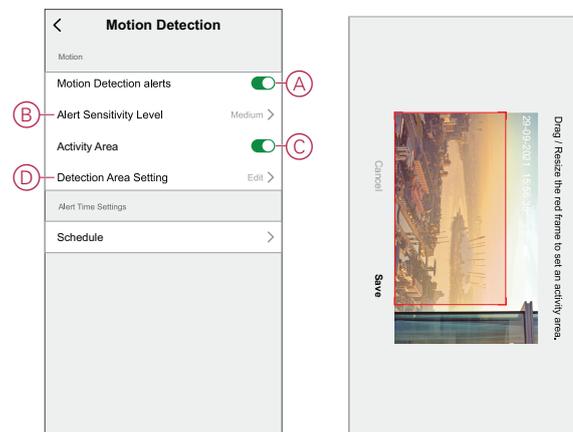

## Activity area

Using the Wiser app, you can set the surveillance area for motion detection.

1. Tap the toggle switch (C) to enable the **Activity area**.
2. Tap **Surveillance area settings** (D) and drag/resize the red frame to set the surveillance area and tap **Save**.

**NOTE:**

- The motion is detected only in the saved surveillance area.
- The privacy zone detection area setting overrides the motion detection activity area setting. Therefore, even if the motion detection activity area is larger than the privacy zone detection area, the motion will only be detected within the privacy zone detection area.

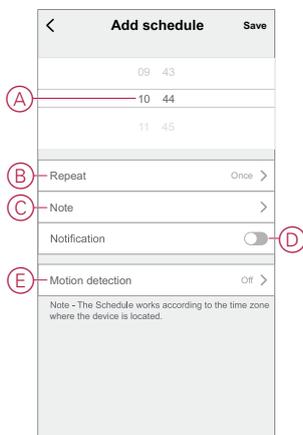

## Scheduling detection alarm

Using the Wiser app, you can add a schedule that allows you to turn off/on motion detection automatically based on your needs.

Follow the steps to schedule the motion detection:

1. On the **Home** page, tap **All devices > IP Camera Outdoor**.
2. Tap  and tap **Settings > Motion Detection > Schedule**.
3. Tap **Add schedule** and set the time (A).
4. Tap **Repeat** (B) and select the days you want the schedule to repeat.

5. Tap **Note** (C), enter the note and tap **Confirm**.
6. Tap the toggle switch (D) to turn on the **Notification** for the schedule.
7. Tap **Motion detection** (E), select one of the options:
  - **On** - Turns on the motion detection on the scheduled time
  - **Off** - Turns off the motion detection on the scheduled time

8. Tap **Save**.

## Setting privacy zone

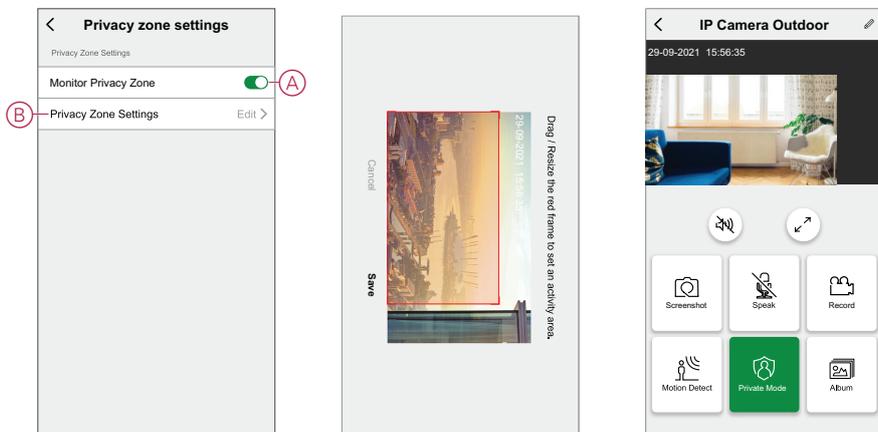

The Privacy Zone settings allows you to set the surveillance area for monitoring on the live view.

Follow the steps to set the privacy zone:

1. On the **Home** page, tap **All devices** > **IP Camera Outdoor**.
2. Tap  and tap **Settings** > **Privacy Zone**.
3. Tap the toggle switch (A) to turn on the **Privacy Zone**.
4. Tap **Surveillance area setting** (B) and drag/resize the red frame to set the surveillance area and tap **Save**.

The live view on the control panel will show only the saved surveillance area.

**NOTE:** The privacy zone detection area setting overrides the motion detection activity area setting. Therefore, even if the motion detection activity area is larger than the privacy zone detection area, the motion will only be detected within the privacy zone detection area.

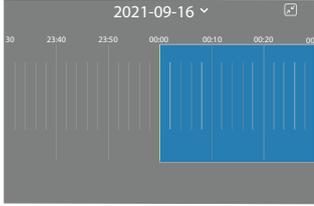

## Playback

Using the Wiser app, you can review the recording whenever you want with the Playback feature.

**NOTE:** You need to insert a micro-SD card (max 128 GB) to use the playback feature.

The control panel of the playback consists of:

	<p>Select the recording date and time</p>
	<p>Click screenshot of the video</p>
	<p>Pause/play the recording</p>
	<p>Record the video</p>

**NOTE:**

- A display screen on the control panel shows the previous recordings.
- The screenshot/recording will be saved in the album.

## Recording settings

Follow the steps to change the recording settings:

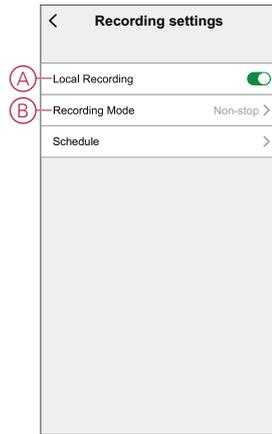

1. On the **Home** page, tap **All devices > IP Camera Outdoor**.
2. Tap  and tap **Settings > Recording Settings**.
3. In the **Recording Settings** section, tap the toggle switch (A) to enable the **Local recording**.

**NOTE:** The recording will be saved to the micro-SD card.

4. Tap **Recording mode** (B) and select one of the options:

**NOTE: Recording mode** is enabled only when you turn on the **Local recording** toggle switch.

- **Event recording** - Records only when there is a motion detection
- **Non-stop** - Records continuously for 24 hours

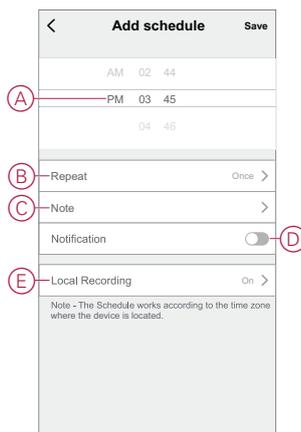

## Scheduling playback

Using the Wiser app, you can add a schedule that allows you to turn off/on recording automatically based on your needs. Follow the steps to schedule the recording:

1. On the **Home** page, tap **All devices** > **IP Camera Outdoor**.
2. Tap  and tap **Settings** > **Recording Settings** > **Schedule**.
3. Tap **Add schedule** and set the time (A).
4. Tap **Repeat** (B) and select the days you want the schedule to repeat.
5. Tap **Note** (C), enter the note and tap **Confirm**.
6. Tap the toggle switch (D) to turn on the **Notification** for the schedule.
7. Tap **Local recording** (E), select one of the options:
  - **On** - Turns on the recording during the scheduled time
  - **Off** - Turns off the recording during the scheduled time

**NOTE:** The recording will be saved to the memory card.

8. Tap **Save**.

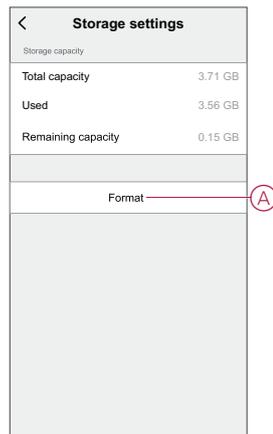

## Storage settings

Follow the steps to change the recording settings:

1. On the **Home** page, tap **All devices** > **IP Camera Outdoor**.
2. Tap  and tap **Settings** > **Storage Settings**.

- In the **Storage Settings** section, tap **Format**(A) to format the inserted micro-SD card.

**IMPORTANT:** This will delete all the data stored on the micro-SD card.

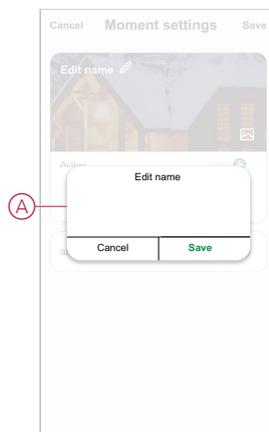

## Creating a moment

A Moment allows you to group multiple actions that are usually done together. Using the Wiser app, you can create moments based on your needs (such as movie night).

Follow the steps to create a moment:

- On the **Home** page, tap .
- Go to **Moment** > **+** icon to create a moment.
- Tap **Edit name**, enter the name of the moment (A) and tap **Save**.

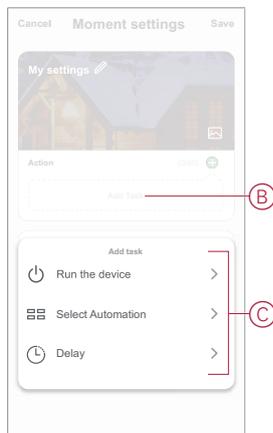

**TIP:** You can choose the cover image that best represents your moment by tapping .

- In the **Action** section, tap **Add task** (B) to open the slide-up menu.

5. In the **Add task** menu, you can do either or all of the following actions (C):
  - **Run the device** - Select the devices that you want in a moment
  - **Select Automation** - Select the automation that you want to enable or disable. For more info refer to Automation, page 20.
  - **Delay** - Set the delay time

**NOTE:** You can add one or more actions using .

6. Tap **Run the device > IP Camera Outdoor** to select either or all of the functions to add in the moment:
  - **Private Mode** - Turn on/off the private mode (D)
  - **Record Switch** - Turn on/off the recording (E)
  - **Recording Mode** - Select the type of recording (F)
  - **Privacy Area Switch** - Turn on/off the privacy zone (G)

7. Once all the actions are set, tap **Save**.

## Editing a moment

To edit a moment:

1. On the **Moment** tab, locate the moment you want to edit and tap **⋮**.
2. On the **Edit** page, you can tap each item (such as dimmer, shutter, delay, temperature, etc.) to change the settings.

**TIP:**

- You can add one or more actions using .
- To delete an existing action, slide the each item towards left and tap **Delete**.

## Deleting a moment

To delete a moment:

1. On the **Moment** tab, locate the moment that you want to delete and then tap **⋮**.
2. Tap **Delete** and tap **Ok**.

**NOTE:** After deleting a moment, the device action can no longer be triggered.

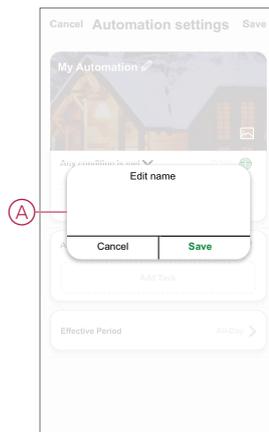

## Creating an automation

An automation allows you to group multiple actions that are usually done together, triggered automatically or at scheduled times. By using the Wiser app, you can create automations based on your needs.

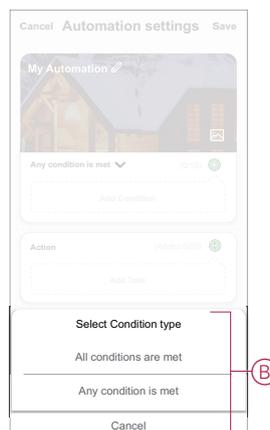

Follow the steps to create an automation:

1. On the **Home** page, tap the .
2. Go to **Automation** > **+** to create an automation.
3. Tap **Edit name**, enter the name of the automation (A) and tap **Save**.

**TIP:** You can choose the cover image that best represents your automation by tapping .

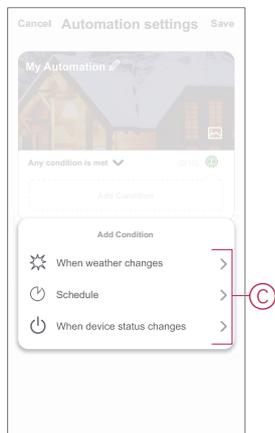

4. Tap **Any condition is met** to select any one of the condition type (B):
  - **All conditions are met** - The automation is triggered when all the conditions are met
  - **Any condition is met** - The automation is triggered when at least one condition is met

5. Tap **Add Condition** to open the slide-up menu.

6. In the **Add Condition** menu, you can do either or all of the following options (C):
- **When weather changes** - Select the various weather settings
  - **Schedule** - Set the time and day
  - **When device status changes** - Select the device and it's function

Note: You can add one or more conditions using .

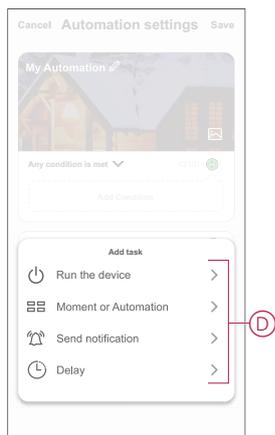

7. Tap **When device status changes > Window/Door Sensor > Open**.  
**NOTE:** : This is an example of an automation to switch on the Event Recording when the Window/Door is Open.

8. Tap **Add task** to open the slide-up menu.

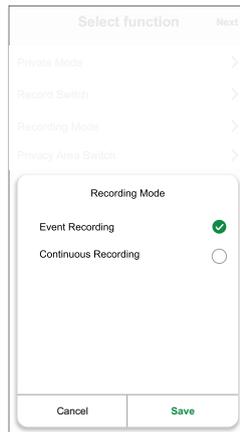

9. In the **Add task** menu, you can do either or all of the following options (D):
- **Run the device** - Select the devices that you want to be triggered
  - **Moment or Automation** - Select the moment which you want to trigger or select the automation that you want to enable or disable
  - **Send notification** - Turn on notification for the automation
  - **Delay** - Set the delay time

**NOTE:** You can add one or more actions using .

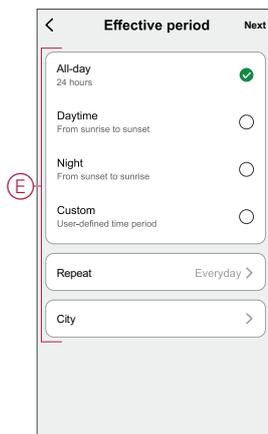

10. Tap **Run the device > IP Camera Outdoor > Recording Mode**

11. Select **Event Recording** and tap **Save**.

12. Tap on Effective period to set the time range for the automation. You can select any one of the following (E):

- **All-day** - 24 hours
- **Daytime** - From sunrise to sunset
- **Night** - From sunset to sunrise
- **Custom** - User defined time period

13. Once all the actions and conditions are set, tap **Save**.

Once the automation is saved, it is visible on the **Automation** tab. You can tap the toggle switch on the automation to enable it.

## Editing an automation

To edit an automation:

1. On the **Automation** tab, locate the automation you want to edit and tap **⋮**.
2. On the **Edit** page, you can tap each item (such as dimmer, shutter, delay, temperature, etc.) to change the settings.

### TIP:

- You can add one or more actions using **+**.
- To delete an existing condition or action, slide each item towards left and tap **Delete**.

## Deleting an automation

To delete an automation:

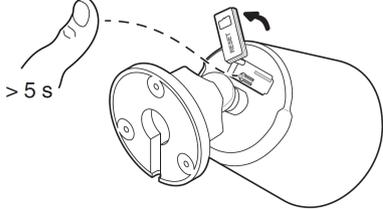

1. On the **Automation** tab, locate the automation that you want to delete and then tap **⋮**.
2. Tap **Delete** and tap **Ok**.

**NOTE:** After deleting an automation, the device action can no longer be triggered.

## LED indications

LED Indication	Status
LED is Solid red 	Device is initiated successfully.
LED blinks red 	Device is in reset mode. Device is ready for pairing
LED is Solid blue 	Device is initiating. The connection is successful.
LED blinks blue 	Device is pairing to the network. The device is offline.

## Troubleshooting

Symptom	Possible cause	Solution
The device is not ready to pair after the device is removed from the app.	The device is not reset correctly.	Remove the lid on the back of the camera and press the reset push button for 5 seconds to reset the device.
The device does not respond.	Wrong Wi-Fi credentials are entered during the pairing process. <b>NOTE:</b> You must log into 2.4 GHz network.	 > 5 s
The Wiser IP Camera Outdoor cannot connect to the internet via the Wi-Fi network router.	The router port settings may not be properly set for system access to the internet.	Check that the following router ports are open: <ul style="list-style-type: none"> <li>• Port 6667</li> <li>• Port 6666</li> <li>• Port 6668</li> <li>• Port 6669</li> <li>• Port 1883</li> <li>• Port 8886</li> <li>• Port 8883</li> <li>• Port 443</li> </ul> <b>IMPORTANT:</b> For cyber-security, check that all unused ports are closed.

## Technical Data

Nominal voltage	AC 100–240 V, 50/60 Hz
Power supply	12 VDC, 1A
Power consumption	max. 6 W
Operating temperature	-20 °C to 60 °C
Operating humidity	< 95% RH
Protection class	IP Camera : IP56 Power supply : IP20 Connector : IP20
Cable length	IP Camera to connector : 0.6 m Power supply to connector : 1.5 m
Operating frequency	2405 – 2480 MHz
Max. radio-frequency power transmitted	< 100 mW
Wi-Fi® standard	IEEE 802.11 b/g/n 2.4 GHz
Wi-Fi® security	WPA-PSK/WPA2-PSK
Channel bandwidth	Support 20/40 MHz
Data security	AES128
Resolution	1080p
Wide angle lens	103° horizontally 54° vertically
Night vision IR range	10 m
Local storage support	Micro SD card, max. 128 GB SDHC and SDXC type micro-SD cards with FAT32 format are supported
