# **Safety Information**

# **Important Information**

Read these instructions carefully and look at the equipment to become familiar with the device before trying to install, operate, service, or maintain it. The following special messages may appear throughout this manual or on the equipment to warn of potential hazards or to call attention to information that clarifies or simplifies a procedure.

The addition of either symbol to a "Danger" or "Warning" safety label indicates that an electrical hazard exists which will result in personal injury if the instructions are not followed.

This is the safety alert symbol. It is used to alert you to potential personal injury hazards. Obey all safety messages that accompany this symbol to avoid possible injury or death.

# **A A DANGER**

**DANGER** indicates a hazardous situation which, if not avoided, will result in death or serious injury.

Failure to follow these instructions will result in death or serious injury.

# 

**WARNING** indicates a hazardous situation which, if not avoided, **could result** in death or serious injury.

# 

**CAUTION** indicates a hazardous situation which, if not avoided, **could result in** minor or moderate injury.

# NOTICE

NOTICE is used to address practices not related to physical injury.

# **Exxact - Connected Single Socket Outlet 16 A**

# For your safety

### 

#### HAZARD OF ELECTRIC SHOCK, EXPLOSION, OR ARC FLASH

Safe electrical installation must be carried out only by skilled professionals. Skilled professionals must prove profound knowledge in the following areas:

- Connecting to installation networks.
- Connecting several electrical devices.
- Laying electric cables.
- Safety standards, local wiring rules and regulations.

Failure to follow these instructions will result in death or serious injury.

### About the device

The Connected Single Socket Outlet 16 A (hereinafter referred to as **Socket Outlet**) is a connected electrical outlet designed to manage and control electrical devices in a convenient and efficient manner. You can remotely control and monitor the energy consumption of the plugged-in load.

The Socket outlet is equipped with a temperature and overload protection and mechanism. When the Socket outlet is used with a high load, the mechanism can switch off the Socket outlet, help to ensure overheat and overload protection.

#### NOTE:

- · Do not connect any devices that depend on a permanent power supply
- · Do not mix different load types in the controlled socket
- Do not use multi-sockets in the controlled socket
- Do not use for EV charging

#### Installing the device

Refer to the installation instruction supplied with this product.

See Connected Single Socket Outlet 16 A.

### **Quick Home Connect**

Quick Home Connect is a wireless connectivity solution for Zigbee devices without the need for a Hub/Gateway or smartphone application. Quick Home Connect is your starting point for wireless home automation. It performs functions like switching, dimming and shutter control using the Connected Wireless Switch (hereinafter referred to as Wireless switch) via a Zigbee network.

The **Wireless switch** is a battery-powered wireless push-button switch that is used to control Zigbee devices (such as dimmer, shutter, switch, and socket) within the same Zigbee network.

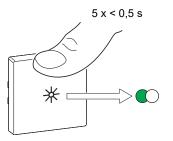

### Limitations

- Quick Home Connect serves only as a room control solution.
- With a 1-gang Wireless switch, you cannot mix lighting and shutter control. However, with a 2-gang Wireless switch, you can assign one gang for dimming/switching and the other for shutter control, or vice versa.
- This solution does not support remote control, smartphone app usage, or scheduling features.

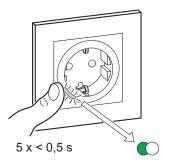

#### **Pairing Wireless Switch with Single Socket Outlet**

1. Short press the upper push button 5 times in quick succession on the Wireless switch.

The status LED blinks green.

2. Short press the push-button of the Socket Outlet 5 times in quick succession. The status LED blinks green.

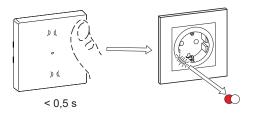

Upon successful pairing, the green LED on the Wireless switch and the Socket Outlet will stop blinking.

#### **Operating a Socket Outlet**

Short press the top or bottom of the Wireless switch (< 0,5 s) to turn ON/OFF the socket.

The LED blinks red indicating that the socket outlet is turned On.

### **Resetting the Device in Quick Home Connect**

It is necessary to reset the devices in the following scenarios:

- Unpair the device in Quick Home Connect:
- Refer to
  - Resetting the Wireless switch
  - Resetting the Socket outlet

When reset is done successfully. The Wireless switch and device returns to factory default.

- Integrating into Wiser System
  - If you wish to integrate the devices into Wiser System, reset all the devices in Quick Home Connect and refer to pairing the device with Wiser Hub/ Gateway.

#### **LED Indications in Quick Home Connect**

#### Pairing the device in Quick Home Connect

User Action	LED Indication	Status
Press the push button 5 times in quick succession.	LED blinks green, once per second.	Pairing mode is active for 60 seconds. When pairing is completed, LED stops blinking.

### **Troubleshooting in Quick Home Connect**

Symptom	Possible cause	Solution
LED displays amber on the device.	Pairing not completed and returned to factory default.	<ul><li>Pair the Wireless switch and the device again.</li><li>Refer to</li><li>Socket outlet, page 7</li></ul>
	The Wireless switch and the device are too far away from each other.	Place the Wireless switch in a position closer to the device.
Wireless switch not able to control the device reliably.	The Wireless switch lost pairing.	Pair the device again. Refer to • Socket outlet, page 7
	The Wireless switch battery is discharged.	Replace the battery of the Wireless switch

Scenario	Procedure
Control multiple devices with one Wireless switch.	To control multiple devices with a single Wireless switch, start by pairing it with one device. Then, use the same Wireless switch to pair with additional devices. <b>NOTE:</b> You can pair up to 7 devices to a single Wireless switch.
1-gang FLS with devices (relay switch, dimmer, shutter control, or socket outlet).	Pair the Wireless switch with any of the devices (relay switch, dimmer, shutter control, or socket outlet).
2-gang FLS with devices (relay switch, dimmer, shutter control, or socket outlet).	Pair either left or right Wireless switch with any of the devices (relay switch, dimmer, shutter control, or socket outlet). You can also pair another rocker of the Wireless switch with another device.

### Pairing the device with the Wiser Gateway

Using the Wiser app, pair your device with the **Gateway/Hub** to access and control the device. You can either add the device manually or do an auto-scan to pair it.

**NOTE:** The Socket Outlet shows a non-zero energy consumption value when the device is added to the app if the Socket Outlet was in ON state with a load connected before pairing it to the **Gateway/Hub**.

#### Pairing device manually

To pair the device manually:

- 1. On Home page, tap +.
- 2. Tap 🖸 and select the **Wiser Hub** .
- 3. Select an option to add the device (A):
  - Add Device with Install Code
  - Add Device without Install Code

< Add Device	
Install Code is Recommended	
To enhance network security, we strongly recommend using the install code to add a device. You can find the install code on the device. If you are unable to scan or type the install code, you can still add the device without it.	
Add Device with Install Code	
Add Device without Install Code	

**TIP:** It is highly recommended to add the device with install code.

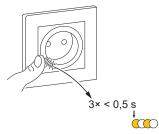

- 4. To pair the device with install code, tap **Add Device with Install Code** to display the slide-up menu. Select any one of the options (B):
  - Scan Install Code you can scan the device for the install code.
  - Enter Install Code Manually you can manually enter the install code from the device.

After pairing the device with install code, proceed to Step 6.

	< Add Device	
1		
	Scan Install Code	
	Enter Install Code Manually	B
	Cancel	

5. To pair the device without install code, tap Add Device without Install Code.

6. Short press the push button 3 times (< 0,5 s).

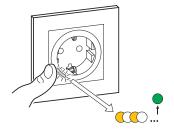

The LED blinks amber.

7. In the app, select **Confirm LED** is blinking amber and tap **Start configuration** (C).

The app displays the progress of connecting the device.

8. After a few seconds, a solid green LED indicates that the device is successfully paired to the Gateway.

9. Once the device is added in the app, tap **Done**.

#### Pairing device with auto scan

Pairing the device with auto scan automatically discovers the device when the corresponding device is powered on. To pair the device:

- 1. On the **Home** page, tap +.
- 2. Tap Auto scan and tap Confirm.
- 3. If you have multiple gateways, do Step 4 or proceed to Step 5.
- 4. Tap Select hub and select the Wiser hub from the slide-up menu.

- 5. Short press the push button 3 times (< 0.5 s).
  - NOTE:
    - The LED blinks amber.
    - Wait for a few seconds until the device search is complete.

**TIP:** If you want to pair multiple devices at once, perform step 5 on each device and wait for a few seconds.

6. Tap Next (A) and select Connected Single Socket Outlet 16A.

7. Once the device is added successfully, tap **Done**.

# **Configuring the device**

### Changing the device icon

You can change the device icon using the Wiser app.

- 1. On the Home page, select the device for which you wish to change the icon.
- 2. At the top-right corner of the screen, tap
- 3. Tap edit  $\checkmark$  next to the device name.
- 4. Tap **Icon** to view the menu.
- 5. In the slide-up menu, select any one of the following (A) to change the device icon:
  - Take photo: Allows you to take a photo with your mobile camera.
  - Select from Icon Library: Allows you to select an icon from the app library.
  - Select from album: Allows you to select a photo from the mobile gallery.

#### **Renaming the device**

You can rename the device using the Wiser app.

- 1. On the Home page, select the device for which you wish to rename.
- 2. At the top-right corner of the screen, tap
- 3. Tap edit *L* next to the device name.

4. Tap **Name**, enter the new name (A) and then tap **Confirm**.

<		
Ren	name	
Cancel	Confirm	)>

### Changing the device location

You can change the device location using the Wiser app.

- 1. On the **Home** page, select the device for which you wish to change the location.
- 2. At the top-right corner of the screen, tap  $\checkmark$ .
- 3. Tap edit *i* next to the device name.
- 4. Tap Location.
- 5. Select the desired location from the list (A) and then tap Save.

< Device location	Save	
Living Room	0	
Master Bedroom	0	
Kitchen	0	
Dining Room	$\bigcirc$	A
Study Room	$\bigcirc$	
Kids Room	0	

# **Removing the device**

Using the Wiser app, you can remove a device from the device list. To remove the device:

- 1. On the Home page, tap All devices >Connected Single Socket Outlet .
- 2. Tap to display more details.
- 3. Tap Remove and Factory Reset Device (A).

< More	
Outlet	Socket
Room: Outlets	
Device information	>
Moment and Automation	>
Others	
FAQ & Feedback	>
Add to home Screen	>
Check for firmware update	No updates available. >
Remove and Factory F	Reset Device

**TIP:** Alternatively, you can long tap on the **Connected Single Socket Outlet** on the **Home** page to remove the device.

**NOTE:** By removing the device, you will reset the device. If you still have a problem with the reset, then refer to resetting the device, page 16.

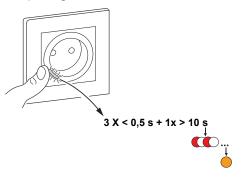

#### **Resetting the device**

You can reset the device to factory default manually.

1. Short-press the push button three times (<0.5 s) and then long-press the push button once (>10 s). The LED blinks red after 10 s, and then release the push button.

Upon successful reset, the LED stops blinking. Then, the device restarts and blinks green for a few seconds.

**NOTE:** After reset, the LED turns amber, indicating that the socket is ready for pairing.

### Using the device

The Control Panel allows you to switch the Socket Outlet On and Off and monitor the energy consumption.

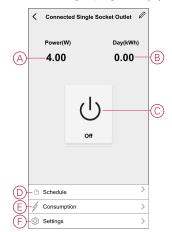

On the **Home** page, tap **All devices** > **Connected Single Socket Outlet** to access the control panel.

On the Socket Outlet control panel page, you can see the following:

- Power (W) The load value of the device connected to the Socket Outlet (A)
- Day (kWh) The total energy consumption of the device connected to the Socket Outlet per day (B)

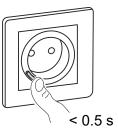

**NOTE:** The total energy consumption per day value will automatically reset to zero at 00:00 hrs everyday.

- The current state of the Socket Outlet (C)
- Schedule, page 17 (D)
- Consumption, page 18 (E)
- Settings, page 18 (F)

#### Switching On/Off the device manually

You can switch On/Off the Socket Outlet manually. The Socket Outlet will provide power to the electrical appliance connected to it. Short press the push button once to switch On/Off the Socket Outlet.

#### Switching On/Off the device using app

By using the Wiser app, you can switch On/Off the device. To switch the device On/Off:

1. On the **Home** page, tap the power button (A) to switch On/Off the Socket Outlet.

2. Alternatively, you can navigate to the control panel, page 16 of the device and (1)

tap  $\bigcup$  to switch On/Off the Socket Outlet.

NOTE: The control panel shows the current state of the Socket Outlet.

#### **Creating a schedule**

The Socket Outlet can be controlled and triggered by a schedule. Once the schedule is set, your system will follow the active schedule. You can create or modify the schedules at any time. To create a schedule:

- 1. On the Home page, tap All devices > Connected Single Socket Outlet .
- 2. Tap Schedule > Add schedule to add a schedule.
- 3. Set the time (A).
- 4. Tap **Repeat** (B) to select the days you want to set the schedule.
- 5. Tap Note (C), enter the note and tap Confirm.

- 6. Tap the toggle switch (D) to turn On the **Notification** for the schedule. The app will send a notification that the scheduled task is executed at the time of schedule.
- 7. Tap Socket (E) and select one of the options:
  - On Turns On the Socket Outlet on the scheduled time
  - Off Turns Off the Socket Outlet on the scheduled time

	<	A	dd So	chedu	le	Save
			09	25		
$\triangle$		AM	10	26		
		PM				
B	Repea	at				Once >
C-	-Note					>
	Notific	ation				
E	Socke	t				on >
		The Sched		s accordir	ng to the	timezone

8. Tap Save.

#### Checking the energy consumption

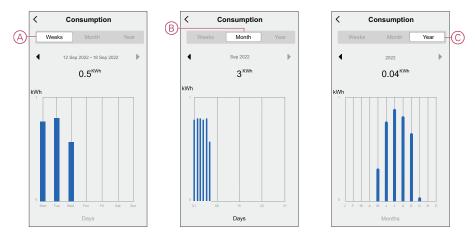

Using the Wiser app, you can monitor the energy consumption of the load connected to the device by accessing the consumption feature.

**TIP:** You can see the daily real-time energy consumption value of the load connected to the device on the control panel, page 16 of the device.

To check the device energy consumption history:

- 1. On the Home page, tap All devices > Connected Single Socket Outlet .
- 2. On the device control panel page, tap Consumption.
- 3. In the **Consumption** page, you can see the total energy consumption and it's changes in Week (A), Month (B), and Year (C) view in the graph.

You can tap each bar on the graph to see the total energy consumed on a particular day/month.

#### Selecting LED indicator mode

Using the Wiser app, you can select the LED indicator mode for easy identification of the device status.

To set the LED indicator modes:

- 1. On the Home page, tap All devices >Connected Single Socket Outlet .
- 2. On the device control panel page, tap **Settings**.
- 3. Tap LED Indicator Mode (A) and select any one of the following:
  - Reverse With Load The LED on the Socket Outlet is On when the device is Off
  - Consistent With Load The LED on the Socket Outlet is On when the device is On
  - Always Off The LED on the Socket Outlet is always Off
  - Always On The LED on the Socket Outlet is always On

For information on LED color during each modes, refer to LED Indication, page 28.

#### **Creating a moment**

A Moment allows you to group multiple actions that are usually done together. Using the Wiser app, you can create moments based on your needs (such as movie night).

To create a moment:

- 1. On the **Home** page, tap
- 2. Go to **Moment > +** to create a moment.
- 3. Tap Edit name, enter the name of the moment (A) and tap Confirm.
  - **TIP**: You can choose the cover image that represents your moment by tapping  $\overleftarrow{}$ .

- 4. In the Action section, tap Add task (B) to open the slide-up menu.
- 5. In the Add task menu, you can do either or all of the following actions (C):
  - Run the device Select the devices that you want in a moment
  - Select Automation Select the automation that you want to enable or disable. Refer to Creating an automation, page 23
  - Delay Set the delay time

NOTE: You can add one or more actions using  $\oplus$ .

Action		(0/60) <b>()</b>	
	Add Task		0
	Add task	_	
U R	un the device	>	
EE Se	elect Automation	>	-0
( <sup>1</sup> ) D	elay	>	

- 6. Tap **Run the device > Connected Single Socket Outlet > Socket** to select either or all of the functions to add in the moment:
  - On Switch On the Socket Outlet (D)
  - Off Switch Off the Socket Outlet (E)
  - Reverse Switch Toggle the last state of the Socket Outlet (F)

<	Selec	t functio	n	Next
Se				>
ſ	\$	Socket		
2	-On		(	
ST-	-Off -Reverse Switch			
E)	-Reverse Switch		(	
				_
	Cancel		Save	

7. Once all the actions are set, tap **Save**.

#### **Editing a moment**

- 1. On the **Moment** tab, locate the moment you want to edit and tap •••.
- 2. On the **Edit** page, you can tap each item (such as dimmer, shutter, delay, temperature, etc.) to change the settings.

TIP:

- You can add one or more actions using
- To delete an existing action, slide each item towards left and tap **Delete**.

#### **Deleting a moment**

To delete a moment:

- On the Moment tab, locate the moment that you want to delete and then tap ●●●.
- 2. Tap **Delete** and then tap **Ok**.

**NOTE:** After deleting a moment, the device action can no longer be triggered.

#### **Creating an automation**

An automation allows you to group multiple actions that are usually done together, triggered automatically or at scheduled times. By using the Wiserapp, you can create automations based on your needs. To create an automation:

- 1. On the **Home** page, tap the
- 2. Go to **Automation** > + to create an automation.
- 3. Tap Edit name, enter the name of the automation (A) and tap Confirm.

**TIP**: You can choose the cover image that represents your automation by tapping  $\overleftarrow{\sim}$ .

- 4. Tap Any condition is met to select any one of the condition type (B):
  - **All conditions are met** The automation is triggered when all the conditions are met
  - Any condition is met The automation is triggered when at least one condition is met

5. Tap Add Condition to open the slide-up menu.

- 6. In the **Add Condition** menu, you can do either or all of the following options (C):
  - When weather changes Select the various weather settings
  - Schedule Set the time and day
  - When device status changes Select the device and it's function

Note: You can add one or more conditions using 🔁.

Any c	condition is met 🗸 (0/10	
	Add Condition	
**	When weather changes	>
Ů	Schedule	>
Ċ	When device status changes	>

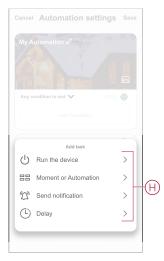

- 7. Tap When device status changes > Connected Single Socket Outlet and select either or all the functions:
  - Socket Turn On/Off the Socket Outlet (D)
  - Power (W) The real-time load value of the connected device (E)
  - Daily Consumption (kWh) The total energy consumption value daily (F)
  - Monthly Consumption (kWh) The total energy consumption value monthly (G)

D-Socket      >        E-Power (W)      >        F-Daily consumption      >		< Select function	
Daily consumption	D	-Socket	>
$\simeq$	Đ	Power (W)	>
$\sim$	F	-Daily consumption	>
G Monthly consumption >	G	-Monthly consumption	>

8. Tap **Add task** to open the slide-up menu.

- 9. In the Add task menu, you can do either or all of the following options (H):
  - Run the device Select the devices that you want to be triggered
  - Moment or Automation Select the moment which you want to trigger or select the automation that you want to enable or disable
  - Send notification Turn On notification for the automation
  - Delay Set the delay time

NOTE: You can add one or more actions using  $\textcircled{\bullet}$ .

- 10. Tap on Effective period to set the time range for the automation. You can select any one of the following (I):
  - All-day 24 hours
  - Daytime From sunrise to sunset
  - Night From sunset to sunrise
  - Custom User defined time period

	< Effective pe	riod Next
	All-day 24 hours	0
	Daytime From sunrise to sunset	0
╢	Night From sunset to sunrise	0
	Custom User-defined time period	0
	Repeat	Everyday >
	City	>

11. Once all the actions and conditions are set, tap Save.

Once the automation is saved, it is visible on the **Automation** tab. You can tap the toggle switch on the automation to enable it.

#### **Example of an automation**

This demonstration shows you how to create an automation to get notification on your app when the total energy consumption value of the Socket Outlet is 50 kWh.

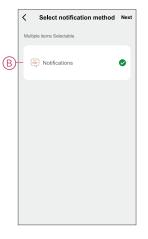

1. Go to Automation > + to create an automation.

- Tap Edit name, enter the name of the automation and tap Confirm.
  TIP: You can choose the cover image that represents your automation by tapping .
- 3. Tap Add Condition > When device status changes > Connected Single Socket Outlet .
- 4. Tap **Daily Consumption**, select the total energy consumption value (A) and tap **Next**.

TIP: You can set the energy consumption value as 50 kWh.

- 5. Tap Add task > Send notification and select Notifications (B).
- 6. Tap Next.

7. In the Automation Settings page, tap Save.

My Au	tomation 🖉	a A
N.		
	N. Press	
Any con	dition is met 🗸	(1/10) 🧲
	Connected Single S	
		I.00kWh
Action		I.00kWh

Once the automation is saved, it is visible on the **Automation** tab. You can tap the toggle switch on the automation to enable it.

Push notification will appear on the screen when the automation is triggered. You can also tap on  $\triangle$  to access the notification history.

#### **Editing an automation**

- 1. On the Automation tab, locate the automation you want to edit and tap •••.
- 2. On the Edit page, you can tap each item (such as dimmer, shutter, delay, temperature, etc.) to change the settings.

TIP:

You can add one or more condition or actions using igodot. ٠

To delete an existing condition or action, slide each item towards left and tap **Delete**.

#### **Deleting an automation**

- 1. On the Automation tab, locate the automation that you want to delete and then tap ....
- 2. Tap Delete and then tap Ok.

NOTE: After deleting an automation, the device action can no longer be triggered.

# **LED** Indication

#### Pairing

User Action	LED Indication	Status
Press the push-button 3 times	LED blinks amber per second.	Pairing mode is active for 30 seconds. When pairing is completed, LED glows green for some time before turning off.

#### Resetting

User Action	LED Indication	Status
Press the push-button 3 times and hold it down once for > 10 s.	After 10 s, the LED blinks red.	The device is in reset mode. It is reset to the factory settings after 10 seconds. The device then restarts and the LED blinks green for a few seconds and then stays amber.

#### LED Indicator Mode/Backlight Mode

Load Status	ON	OFF
Reverse with load	No LED	•
Consistent with load		No LED
Always Off	No LED	No LED
Always On		•

# Troubleshooting

Symptom	Possible cause	Solution	
The Socket Outlet is not turning ON.	The Socket Outlet is broken or it could be an alarm if the LED blinks red.	Initially, turn off the socket outlet, disconnect it from the power supply and turn it on after some time. If it still not working, you can replace the socket outlet. For more information about the wiring refer to the installation instructions.	
When there is an alarm, the user cannot switch ON the output locally or remotely. LED blinks fast RED.	Clear the Socket Outlet alarms.	To clear the alarm, press and hold the push button for 4 seconds. After 4 seconds, the blinking will stop and the alarm will be cleared. You can use the Socket Outlet again.	
		<b>NOTE:</b> Before clearing the alarm, you must verify the reason for overcurrent fault and thermal fault.	

## **Technical Data**

Nominal voltage	AC 230 V ~, 50 Hz
